

FIST PRE-EXPERIMENT WORKSHEET 1

Name of scientists: _____

Mentor: _____

Date: _____

1. Problem What is the problem you identified / are trying to solve? Why is it important?

2. Question Based on the problem, what is your question you are trying to answer?

3. Hypothesis Write a hypothesis. *"If [independent variable is changed in ... way], we predict that [dependent variable will change in ... way]."*

4. Variables

Independent Variables
(variables you are changing)

Dependent Variables
(variables affected as a
result of changing the
independent variable)

Controlled variables
& how to reduce
(variables you need to
keep constant)

FIST PRE-EXPERIMENT WORKSHEET 2

5. Materials

List all the materials needed for your experiment. Be specific (include quantity, size, type, etc.)!

6. Procedures

List all the procedures for your experiment. Be detailed!

Procedures (continued)
